ALEX MORRISON

Jib, Camera & Hothead Operator

Employment History:

I have worked as a Sydney-based freelance Camera and Jib Operator for over twenty years. Projects have ranged from overseas documentaries in challenging environments to high-end television commercials, feature films and television work. A comprehensive list of projects can be supplied upon request. Lately I have been working on events using live Virtual Graphics technology and am very familiar with this workflow.

Gear Available:

I can supply a Stanton Jimmy Jib Kit ranging from 6 to 40 feet in reach. I can source any camera and lens gear required for your shoot. The jibs are on wheeled bases for quick repositioning and it is also possible to rig on dolly track. A third axis, 'dutch roll' kit is available as well as a Hothead mount with 60 metres of cable. A Stanton Jib Lite is also available for tight locations where operating footprint is limited. Please call me to discuss your needs.
